

Topics 8 - BSD Socket API

Reading assignment - Chapter 1 §1.4

- Why study BSD Socket API
- Setup socket parameters - `getaddrinfo(3)` and `freeaddrinfo(3)`
- Passive open (server) - `socket(2)`, `bind(2)`, `listen(2)`, `accept(2)`
- Active open (client) - `socket(2)`, `connect(2)`
- Moving messages - `send(2)`, `recv(2)`
- Ending communication - `close(2)`
- Example - simplex server
